

LIVINGPACKETS®

Share our passion and join us on our mission

LivingPackets reinvented packaging with THE BOX - our smart and sustainable intelligent packaging solution. THE BOX enables fantastic new connected services in the areas of e-commerce, deliveries, logistics, packaging and payment. It can be used at least a thousand times before it needs refurbishment. Together, we can save trees, which end up as

cardboard-packaging in the garbage and protect the oceans from one-way plastic used as filling materials. To bring our vision of a fair and sustainable economy and the idea of packaging-as-a-service to life, we search for hands-on doers and bright-minded thinkers to join us in our adventure.

Web Developer Frontend

Full-Time, Berlin, Onsite or Offsite (Onsite Preferred)

What we offer

- › A highly dynamic and international workplace environment with inspiring designers, engineers, and mentors.
- › Insight into the world of eCommerce and logistics by discovering new tools and technologies that will help you improve your skills daily.
- › Access to the latest and blockchain and sensory technology.
- › An opportunity to grow and create a product that people will love to use.

What you'll do

- › Develop, maintain, and improve new and existing websites and webapps
- › Bring to life user stories using animations and create strong engagement
- › Create accessible interfaces and high quality information architecture
- › Strong understanding of user-centered design
